Muhammad Usman

Agricultural Research System, Government of Pakistan, Pakistan

### ***Abstract***

The aim of presentation consist of clinical nutrition, food nutrients, health, industry, employment, income, economy, crises, poverty and hunger were studied and reported that Clinical Nutrition is the major industry for the development of health, basic need of daily life, create employment, generate income, stronger economy, reducing financial crises, global Poverty and hunger in the developing countries of the world particularly in south Asia. The study reported that Clinical nutrition involves studying what nutrients are necessary for your body to function and how what you eat affects your health. Keep reading to find out more about the field of clinical nutrition, including education programs, professional requirements and career information. Schools offering Fitness & Nutrition degrees can also be found in these popular choices. The study further reported that Clinical nutrition is the practice of analyzing if a person is consuming an adequate amount of nutrients for good health. A clinical nutritionist is concerned with how nutrients in food are processed, stored and discarded by your body, along with how what you eat affects your overall well-being. Professionals in this field assess your nutritional needs based on your family and medical history, lifestyle and laboratory tests in order to make recommendations on your diet and individual nutritional needs.
